

Stop the Spread of COVID-19

How to Home Quarantine

Remain at home and avoid all public activities. This means **do not** go to work, church, school, stores, nor any public events or places.

Do not have visitors in your home.

If you live in a home with other people, **stay in a separate room**. If that is not possible, wear a face mask when you are in the same room and stay at least 6 feet away from them.

Wash your hands and use an alcohol-based hand sanitizer often. Do not share personal items such as dishes, cups, forks, spoons, towels, etc.

Do not leave your home except to get medical care. If you need to see a doctor for reasons other than a medical emergency, please call your medical provider ahead of time to make proper arrangements.

911

In the event of a medical emergency, call 911. Tell them that you are in home quarantine due to possible novel coronavirus exposure. Keep a face mask on until a health care provider asks you to remove it.

Do not use any public transportation (buses, taxis, ride share services, or airplane).

Check yourself for fever twice a day. This means taking your temperature in the morning and before bed at night. Write it down on a piece of paper.
